# Air Handling Units

## Introduction

Vectaire's comprehensive and extensive range of air handling units from "Compact" plant room models to custom built belt driven models able to deliver up to 20m<sup>3</sup>/sec ensures that any installation requirement can be met.

## Design brief

To provide a comfortable, healthy environment, often without loss of heat and a multiplicity of parameters -

**The occupants** want a non-intrusive system.

**The designers** want to ensure that air exchange is optimised whilst bringing fresh air into the building.

**The builders** need a reliable product that can be easily installed and set up.

**The answer** lies in well thought out, efficient ventilation.

**The correct ventilation** method is an air handling system which encompasses all of the above.

## What product to choose?

Stricter rules governing air tightness of buildings means more emphasis on controlled fresh air supply. Air handling units, which are easy to install and which have a wide variety of options, will effectively ventilate the required area providing a healthy atmosphere for people to work and play. Vectaire's range of units, together with comprehensive, computerised design facilities, gives the specifier the ability to choose a fan capacity which ensures a proper level of ventilation, together with **heating, heat recovery, sound attenuation and control options**.

## Flexibility

Vectaire's air handling units are available in an extensive range with a variety of options which contribute to their versatility of use and ensure that exactly the correct unit can be specified. There are direct drive versions either electrically or hot water heated together with belt driven units for bigger airflow requirements. Combine this with the facility for custom built systems, and the flexibility of design and use is infinite.

## Technical Support

With its firm commitment to quality and customer care, Vectaire's technical support staff can help with your requirements.

## Installation

Vectaire can advise on installing and commissioning your air handling unit system and can give full technical back-up.

# Air Handling Units

## Quality Control

Vectaire air handling units are manufactured to the highest quality and inspected at every stage of the manufacturing process. All products are built to BS EN ISO 9001. We operate a continuous evaluation of products and services to ensure customer requirements are met in full.

## Materials

Vectaire air handling units are generally finished in galvanised, double skinned steel with 25mm thick mineral wool slab insulation and have a triple layer of steel at the corners with pre-drilled 8mm dia holes providing an ideal location for fixing points. All panel filters are manufactured from bonded and coated continuous spun glass fibre filaments with arrestance of 84% to G3 grade.

## Heating Control Panels

Designed for quick and easy installation with external wiring kept to a minimum. A mains supply is taken to the panel door interlocked isolator and outputs then taken to the fan, heater and safety circuits. Sensors are supplied pre-wired to the panel. Switches on the front of the panel allow control of the fan and heater. All outputs to the fan are protected. All control panels are stand alone, but can be BMS compatible as an option.

## Options

A full range of accessories and controls are also available - these include

- intake damper/mixing box
- electric or hot water frost heaters
- bag filters
- cooling coils
- heat recovery systems
  - cross flow heat exchangers
  - thermal wheel
  - run around coils
- alternative heating source
  - gas fired
- casings
  - 50mm panels can be supplied with high density mineral wool and barrier matt
  - can be constructed in a vertical or horizontal layout
  - can be supplied as "flatpack" for on site assembly

**Manufactured in UK to ISO 9001**

# Air Handling Units

## *Custom Built*

### General

VECTAIRE offers an extensive range of supply/extract units and associated ancillary equipment. Fans are available which cater for air volumes up to 20 m<sup>3</sup>/sec, for both internal and external applications. Most design parameters can be accommodated, and among the many variants we are able to provide are the following.

### Cases

- single or double skinned with 25mm or 50mm thick panels.
- different panel infill, including a combination of high-density mineral wool and barrier matt to give high noise reduction.
- differing panel skin materials including stainless steel, aluminium and plastic coated sheet steel.
- powder coat paint finish to any BS or RAL number to either internal, external or both surfaces.
- casings supplied in "flat pack" form to facilitate site assembly.

### Components

- The following components can be readily catered for:
  - **filters**
    - CARBON
    - HEPA
    - GREASE
    - WASHABLE
  - run-a-round coil systems
  - thermal wheels
  - gas fired heaters - indirect and direct
  - **fans**
    - SISW
    - DUPLEX (FOR LOW PROFILE)
    - TWIN MOTORS
    - SINGLE PHASE
    - 2 SPEED
    - MOUNTED OUT OF AIR STREAM
    - FITTED WITH STANDBY

### Specifications

- units can be designed to meet the requirements of the following:
  - HTM03/01
  - CO4

### Controls

- any variation of control package can be supplied:
  - simple pre-wiring of motor to an external isolator
  - an in-built control panel pre-wired to motors, damper motors, sensors etc
